What To Do if You Suspect You Have a Gas Leak

If you smell gas or think that you may have a gas leak somewhere do not try and investigate the problem or attempt to fix a leak or a faulty appliance yourself. Call National Grid Gas Emergencies (Formally Transco Gas) 24 hour emergency line 0800 111 999.

Open your windows and doors to let air in, make sure all gas appliances are turned off and turn the gas off at the mains if possible. Do not turn lights on or off and avoid using other electrical switches and appliances. Do not smoke, light a match or any other naked flame.
